

# CAPACITY+ LOW-PROFILE SECONDARY SEAL

DirecTank's **Capacity+** Low-Profile Secondary Seal provides the lowest vertical profile with maximum working range, giving owner/operators the ability to optimize the usable working capacity of their tanks. For a typical floating roof configuration, the **Capacity+** can potentially provide thousands of barrels of product capacity gains per tank turnover.

Equipped with a robust, PTFE-wrapped wiper tip, and critical components manufactured from high-strength, hardened spring steel, the **Capacity+** provides the best blend of desired features to combat challenging operational conditions, wide variable rim gaps, and tank shell abnormalities while also maximizing product levels. Additionally, the **Capacity+** has been designed with installation-friendly features to minimize time and optimize safety, all at an economical price with the best lead time and warranty in the industry. Add it all up and it becomes apparent: the **Capacity+** is the premium low-profile secondary seal option on the market.

# Key Features

- Extruded, robust two-point wiper tip with 20-mil cross-reinforced PTFE wrap for superior abrasion resistance
- High-strength, spring-steel mechanical components
- Unmatched sealing performance and flexibility ensures a tight fit against the tank shell with virtually no gapping and excellent water-shedding capabilities
- Easily installed while tank remains in-service or out-of-service
- Lowest profile with maximum horizontal working range on the market
- Excellent material compatibility, featuring multiple vapor fabric options
- Satisfies the California South Coast Air Quality Management District requirement for optimal classification as a Category "A" secondary seal.

# Key Benefits

- Robust, customized components provide a continuous, worry-free operation while allowing for maximum product capacity, zero-gap right fit and a long service life.
- Highly resilient and chemically compatible wiper tip. Designed to function in almost all conditions, maintaining a tight fit against general tank abnormalities.
- Excellent support plate compression ensures a tight fit across the entire working range
- Premium, independently certified materials with full traceability
- Simple, safe and fast installation with all-bolted connections, pre-punched fabric and pre-punched, pre-wrapped wiper tip.
- Suitable for a broad range of service conditions, tank shell conditions, stored products, and floating roof types

# About DirecTank

At DirecTank we maintain one of the largest and most diverse inventories in the industry, reinforced by a robust global supply chain management system. We pride ourselves on being truly customer-focused, with a commitment to high-quality, competitively-priced products delivered within the shortest lead time in the industry. We are the most diverse aboveground storage tank (AST) products company in the business, merging cutting-edge ideas with over 100 years of collective experience that has been acquired from all phases of the AST industry.

DirecTank is a proud member of the DSS Group of Companies, privately owned and operated in Houston, Texas, and we are committed to becoming the most trusted AST Products company in the industry.
